ABOUT ME

As a passionate technology enthusiast and self-starter, I thrive on setting and surpassing ambitious goals. My unwavering commitment to staying at the forefront of innovation drives me to explore, learn, and master the latest technologies in the ever-evolving tech landscape. With a proactive mindset, I actively contribute to collaborative teamwork, fostering an environment of shared learning and growth. My ability to adapt swiftly to emerging technologies allows me to lead the charge in implementing cutting-edge solutions that drive success in projects and beyond.

PERSONAL INFO

Name: Muhammad Nabeel
DOB: 28/07/1997
Nationality: Pakistan.
Marital Status: Single

EDUCATION

Virtual University (BSCS)

Bachelors in Computer
Science from VU
Pakistan

WORK EXPERIENCE

Frontend Developer (Vue JS + React JS) (Avaib)

Aug 2022 - Present

Project: Developed a Vue.js-based Web Application for **Numeris**, an audience measurement organization.

Key Contributions:

- Implemented role and permission-based routing for enhanced security.
- Created advanced content & file search functionality.
- Integrated multilingual support using i18n.
- Implemented session timeout functionality across browsers and mobile devices using the Broadcast Channel API.
- Enhanced user engagement by integrating custom events and reporting on Google Analytics (GA4).
- And many more innovative features to enhance user experience.

Project: Contributed to the development of a Fleet Management System using React.js, featuring advanced functionalities.

Key Contributions:

- Implemented vehicle tracking using OpenStreetMap.
- Designed and integrated React Leaflet with custom shapes like polygons and circles.
- Realized real-time car tracking along specified routes using polyline data.
- Provided live car traffic monitoring and search capabilities.
- Developed detailed ride reports.
- Enabled requesting front and back camera video feeds from the car and displaying them on the web application.
- Utilized role and permission-based routing for enhanced security.
- Supported English-to-French translation for a wider audience.
- And many other innovative features to enhance the Fleet Management System.

SKILLS AND TECHNOLOGIES

Programming Language:

- JavaScript

Frameworks & Libraries:

- React.js
- Vue.js
- Next.js
- Three.js

Styling Libraries:

- Ant Design (AntD)
- Material UI
- Tailwind CSS
- Styled Components
- Bootstrap

State Management:

- Redux (Thunk, Saga)
- Vuex

Content Management System:

- WordPress
- Opencart

Project Management

- Jira

Version Control:

- Github
- Gitlab

Analytics:

- Google Analytics (GA4)

Cloud Services:

- Amazon Web Services (AWS)

Web Technologies:

- HTML
- CSS
- Javascript

Frontend Developer (React JS) (Telecard Limited)

Feb 2021 - July 2022

Project: Spearheaded the development of a robust web application for **Bank Al Habib**, leveraging the power of React.js.

Key Contributions:

- Implemented role and permission-based routing to ensure data security and access control.
- Customized CRUD operations based on user, client, and company needs.
- Designed and integrated a campaign management system for efficient calling initiatives.
- Developed a caller system, enabling seamless communication with customers for the inquiry.
- Delivered a feature-rich application tailored to meet the diverse requirements of the banking sector.

Project: Instrumental in the development of the "SONUS" web application for Trax, utilizing the power of React.js.

Key Contributions:

- Created a comprehensive campaign management system that allows users to monitor, create, and update campaigns easily.
- Implemented a user-friendly kanban board using React-DND for efficient campaign management.
- Designed a call flow system using React-flow, enabling users to automate calls.
- Simplified the process of uploading Excel files and automating calls to numbers listed in the file, with customizable voice recordings.
- Contributed to various other features enhancing the functionality of the application.

Developed many CRM systems for companies such as Noorani Seeds, Eiwan Real Estate, and Telecard's proprietary CRM, streamlining their business operations and enhancing customer interactions.

Frontend Developer (JFR Group International)

Jul 2019 - Sep 2020

- Proficiently designed and developed numerous websites, seamlessly blending creativity and functionality using a combination of WordPress, Opencart, and custom website development.
- Demonstrated versatility in crafting visually appealing and user-friendly websites that catered to diverse client needs and industries.
- Leveraged Vanilla JavaScript to enhance website interactivity, ensuring an engaging user experience.
- Collaborated with cross-functional teams to implement innovative design concepts and optimize website performance.
- Consistently maintained and updated websites to align with evolving industry trends and client requirements.
- Contributed to the seamless integration of web applications, improving overall user engagement and satisfaction.
